

Connect face-to-face with anyone, anywhere, via any device

Having a reliable, secure virtual meeting space that enables colleagues, clients and partners to easily and efficiently collaborate is critical to business success.

Meet face-to-face from anywhere

Use any desktop or mobile device

Eliminate travel; virtually connect with employees and clients

Host and record meetings, trainings and webinars

With OfficeSuite HD Meeting[®], you can host and join high-quality video, audio and web conferences with up to 1,000 people from any phone, computer or mobile device.

Collaborate with secure video and audio

Help remote workers securely meet in a virtual environment with our encrypted, cloud-based platform.

Stay connected to your clients and employees

Host and join video, audio and web conferences from any device. Integrated presence and chat for instant collaboration.

Superior visibility and control

Manage user licenses in real time from any device utilizing our award-winning, intuitive WE Connect portal.

Integrates with popular third-party applications

Easily connect to Outlook, Google calendar, Chrome, Slack, Microsoft Teams and more.

Host, meet, share and collaborate in real time

Unlimited number of meetings

Benefit from small to large meeting options: 25, 100, 500 or 1,000 participant options per host.

Built-in HD video conferencing

View up to 1,000 participant videos in a single meeting.

Real-time collaboration

Modify documents with your team or clients in real time.

Share what you want

Share one application or your whole desktop with a single click. No need to “pass controls” to share documents as required with other applications.

Host transfer

Transfer host controls to any participant via the participant menu.

Administrative controls

Enable and disable settings that need to be consistently used by all users on your account.

Control meeting participants

Mute all or individuals, block or delay entry for select participants using waiting room, remove participants and more.

Maximize participants

Allow guests to use a phone and computer to join a meeting without taking up two spaces.

Reminders and notifications

Start and join meetings through pop-up and email reminders.

Secure and compliant

Encrypt all presentation content at the application layer using TLS 1.2 with AES 256-bit algorithm. Features can be disabled to enable HIPAA compliance.

Host video webinars

Support real-time connections for up to 10,000 participants with an optional webinar license.

Quick launcher

Start, join and invite people right from your desktop.

Mobile dial-in

Join meetings automatically from your mobile device.

Presence

View the availability of other licensed users and instantly chat or start a video conference.

Easy recording

Obtain consent and record meetings with one click and save standard MP4 video and MPEG 4 audio files for easy sharing.

Flexible audio access

Connect using any computer, iOS or Android™ device or phone.

Break-out rooms

Split your meeting into as many as 50 separate pre-assigned rooms and switch between sessions at any time.

Calendar integrations

Connect your Outlook and Google calendars with OfficeSuite HD Meeting to schedule and view all meetings within a single interface.

Reports

Report on important meeting metrics, including start and end times, duration and participant details.

Annotation and whiteboard

Write on top of any shared document or screen with easy-to-use whiteboard features that save automatically.

Integrated chat

Instantly chat with one or all meeting participants, or with up to 2,000 users within an out-of-meeting chat group.

License management

Add, allocate, change and delete user licenses on your account in real time through our WE Connect portal.

Schedule privileges

Grant permission for users to schedule meetings on your behalf or schedule meetings on behalf of other users.

Registration

Gather attendee information by customizing registration form fields such as industry and job title.

Polling

Interact with participants and gather real-time survey responses by creating and launching multiple choice polling questions within meetings.

H.323/SIP compatible

Connect existing conference room systems like Poly, Cisco, Tandberg and LifeSize.

Cloud-enabled connectivity, communications and security—guaranteed.
