HIGHLIGHTED CASE STUDY HEALTHCARE DATA CENTER

CA healthcare provider was spending over \$4.1 million annually in electricity expense to operate the data center with a PUE of about 1.73. OUS outfitted the chillers and roof top units at the facility with data controls, converting them to variable speeds and applied a nano-coating to evaporator and condenser coils. OUS also installed power optimization equipment at each of the 4 switchgears, bringing the voltage into balance and reducing KVAR.
