

IT STRATEGIC PLANNING

Modern government IT departments face a number of unique challenges to meet the growing demands of their customers. Sciens Strategic Planning helps to bridge that gap and enable your organization to not only meet those demands, but exceed them.

STAFFING & FINANCIAL BENCHMARKING

Many IT Departments often do not have sufficient staff or money to even cover the core business requirements to “keep the lights on.” We perform an extensive analysis on your current staff levels and budget to gauge where staff should be added and money allocated to optimize your operations.

IMPLEMENTABLE PROJECT RECOMMENETATIONS

Your customers have high expectations when it comes to technology and demand a high level of service from IT. You also have projects that you need to implement. We take these needs, analyze them based off your current resource load and prioritize them throughout the plan lifecycle in a way that you can manage.

OUTWARD FACING PLANS FOR MANAGEMENT

It can be difficult for upper management and council to see your vision for technology. Equally as hard is to get them to understand the backend requirements to support that vision. We develop forward thinking, outward facing plans that sell your vision and present it in an easy to understand way.

WHAT WE DO

Our well-founded process is built to approach each plan individually, crafted for the unique needs of each client. From the kickoff of a project, Sciens focuses on simplifying business operations and IT management by identifying the needed services and the value to your customers then outlining each step to achieve your goals.

WHAT YOU GET

A plan that enables your organization to move to the next level. Whether that is adding staff to further strengthen your organization, prioritizing operational department requests, or even codifying council goals in a realistic manner, Sciens will be your partner throughout the project so that we can develop an implementable, practical plan for you.

ABOUT SCIENS CONSULTING

Sciens Consulting is a local government management and technology consultancy headquartered in McKinney, Texas.

We assess business strategies and align organizations, processes and technologies to improve efficiencies that translate into bottom-line results.
