Overview

Seaton Automation is a systems integrator that specializes in integration of automation and electronic controls for new and existing systems nationwide.

Seaton Automation can design and manufacture high quality turn key automated control systems. We have the knowledge and expertise to provide the correct solution for the specific industry. We can automate an existing system, or design a new process. Designs include electrical schematics, P&ID development, 3D modeling, PLC/HMI Programming and software development, server and network solutions and wireless communications. From initial design, we can provide procurement, installation, calibration and startup of equipment as well as ongoing support. We can provide Project Management services with skilled and knowledgeable professional personnel.

Seaton Automation designs and fabricates control panels using UL 508A standards.
