Overview

Brilled Lighting was established in 2019 and is located in Logan, Utah. Brilled Lighting was founded on the idea that we can make a difference in the lighting industry by creating world-class partnerships to solve the problems lighting and general contractors deal with every single day. As a manufacturer, we work closely with our regional partners to help shorten the supply chain and solve common industry problems with quality, consistency, communication, etc. Our regional partners are companies like general and electrical contractors, lighting distributors, ESCO's, construction supply companies, and the like.

At Brilled Lighting, we have a combined 60 years of experience as engineers producing everything from automation to eye surgery components. We have applied this experience to our products in the LED Lighting industry to ensure we create world-class products that are built to last.

We created Brilled Lighting initially to offer a retrofit product to general customers, but with the complications we continued to see our partners encountering, we knew we could do more to help alleviate their problems. With our extensive experience in engineering and manufacturing, we opened our own facility overseas to manufacture our commercial and industrial LED lighting products.

We have brought in all of our expertise in overseas manufacturing and paired that with USA offices for service, training, and support to be able to bring our customers an overseas price, with a USA feel. This means you don't have to settle for anything less than the best in products and experiences. If you're interested in becoming a regional partner with the Brilled Lighting or testing our products on a project, we would love to talk to you!
