Overview

IT Hardware and Services Provider - Server, Storage, Networking, and Fiber Solutions Provider

OSI is a direct supplier of compatible networking components and a reseller of pre-owned networking, server, and storage hardware. We provide pre-owned hardware outside of authorized manufacturer partnerships with the explicit purposes of providing deeper discounts to end users and to continue supporting and supplying hardware well past its OEM-deemed end of life/end of sale timelines. This allows us to provide the most cost-effective hardware solutions with the longest life cycle.

OSI brand items are new condition and manufactured by OSI. They are engineered to be fully compatible in their intended platforms. They are supported by our in-house engineer staff and are also backed with our Lifetime Warranty.

The pre-owned hardware we offer is not remanufactured or refurbished. It is gently used, fully functioning, and has passed our extensive quality control procedures as well as backed with our Lifetime Warranty.
