Overview

TEAL's unique concept of "central plants as-a-service" has led to the development of innovative, sustainable, vertically-integrated managed central plant solutions that clients never need to own, maintain, or operate themselves. Combining cloud computing and 24/7 remote monitoring technology, TEAL delivers three solutions - the TEAL System, TEAL Aquatherm, TEAL iPlant - to provide hot water, hydronic heat, chilled water, or any combination of the three.

TEAL's environmentally friendly systems deliver dramatic energy savings, lower life cycle costs and unique financial results compared to traditional HVAC & DHW systems. Additionally, our state-of-the-art technology uses data-driven machine learning algorithms for virtual supervision to ensure ZERO downtime 24 hours a day, 365 days a year.
