Overview

We are a disaster preparedness and disaster recovery consulting firm. After an event, we manage grant programs on behalf of our clients such as FEMA's Public Assistance Program (PA) and Hazard Mitigation Grant Program (HMGP), etc. We are experts in damage identification and cost estimating. We use licensed insurance adjusters in our damage assessments and Xactimate certified cost estimators. We have certified thermographers on staff that operate our FLIR technology, which is our infrared cameras that we use to help assess potential hidden water damage. We also have licensed drone pilots on staff that carry the SUAS (Small Unmanned Aircraft System) Part 107, which allows us the ability to capture damage from above. This is extremely important after a disaster because it allows an aspect of relativity with the ability to view the scene from hundreds of feet in the air, documenting the surrounding conditions. We have written hundreds of projects through Grants Portal, FEMA's electronic platform for processing grant applications, that have totaled millions of dollars. We are well versed in FEMA's guidelines such as the Public Assistance Program & Policy Guide, also known as the PAPPG.
