Overview

New Trade Winds, LLC provides Smartphone Charging Technology to a wide variety of end users including educational, hospitals and health care facilities and commercial users.

We offer charging stands, wall-mounts, smart-lockers, carts, solar chargers, battery-powered mains chargers, wireless chargers, battery packs, cables, extension monitors and many other charging related items.

Our least expensive and most successful charging stand can charge 8 devices simultaneously (10 if you add our wireless charging shelf) while our security enabled locker models charge phones in user-selected coded and locked bays.

We also offer on-grid and off-grid technology, mains and solar powered. Our range includes charging tables, hubs, wall workstations, benches, and a plethora of other technologies to suit individualized needs.

For off-grid charging, our new EdgePower™ system provides wall power to inaccessible locations via a system of rechargeable and hot swappable batteries.

Please contact us should you require a closer look at any of our technologies or are in need for charging technologies that are hard to find or leading edge. If you can envision it, we most likely have it or can find someone to provide it for you.
