### **Overview**

CMRS Solutions is a client focused solution provider. CMRS believes in building relationships first, then learning the challenges that get in the way of running your business. We formulate a plan, recommending one or multiple solutions to deliver efficiencies. Our expertise is in No Code Software (WEM ai)Printer Cloud Management, Collaborative Work, Cloud Migration, Cloud Management, VOIP, Office 365, Project Management and Help Desk Solutions.

Wem ai

No Code Low Code Software

90% less time to build and deploy

80%-90% less Cost

Accelerates Digital Transformation

Process Oriented

Maximizes results with minimal effort

Uses point-and-click flowcharts and drag-and-drop items

Users can start to build application functionality with two to three weeks

Capabilities to scale for the web

Fits diverse mobile form factors

The fastest, most effective way to build serious software

Create powerful applications - Design, test and deploy applications in record time with 80% less cost and 90% less time

Visual Development - Intuitively design and visualize in real-time during application development. Built front-end and back-end of your application in the same interface, at the same time.

Integrate with any system or database through web requests with built-in open standards and open-source technologies like JSON, XML, SOAP, REST and OData.

Pre-built connectors empower you to seamlessly integrate your applications with external systems, such as SAP and Salesforce. Build on top of existing databases.

Secure, Scalable, Modern Cloud Architecture

PrinterLogic

PrinterLogic is a server-less SaaS platform that deploys and centrally manages direct IP printers from the CLOUD. Whether you are currently using a traditional print server(s) or direct IP printing, PrinterLogic can manage your entire print infrastructure from a single pane of glass in the cloud. PrinterLogic is entirely agnostic with both end-user device and printer support. The solution provides a versatile UX in printing on or off the network, with secure release and mobility. This one solution addresses infrastructure reduction, offering efficiency in a modern work environment. The single pane eliminates the strain on the help desk, reduces consumable waste, and other IT/print challenges. There is no single point of failure and you can control your print environment wherever your end users are located. Think about it as Centralized Management in today's remote environments.

Smartsheet

A Powerful Platform for the Way You Work Today

- Make Collaboration Work – Empower teams to work together with agility, speed and accountability
- Make Better Decisions Faster – Gain real-time visibility into what matters most to your business
- Automate Work Processes – Enable business users to speed execution and faster innovation
- Deploy with Confidence – A secure and extensible platform, Users can ramp up quickly, share information real time, and the tool is budget friendly.

Cloud Solutions

Cloud solutions are offered through the internet to the users on-demand rather than by the company's own servers . This reduces the need for costly on prem equipment and servers. Including DaaS,, SaaS, IaaS, PaaS, NaaS. Office 365, Backup

Types of Clouds

Public, Private, Hybrid Clouds

VOIP

VOIP (Voice over internet Protocol)

VOIP is the transmission of voice, data and multimedia sessions over IP networks in the form of network packets. The only think you need for VOIP to work is an active internet connection.

Help Desk

A source of technical support for hardware and software that is staffed by professionals who can solve problems and escalate if necessary. All issues are tracked until resolved with escalation time frames so that the customer is not inconvenienced. Reports are generated so that the help desk and the customer can determine if the SLA's are being met and how to improve if necessary. This support can scale to the needs of the business and can be offered on an as need basis.
