Overview

Clear Energy Solutions is an energy savings company with years of experience providing energy efficiency solutions help clients find better ways to heat and cool, illuminate and insulate warehouses, offices, factories, schools and stores. From retrofits to new construction, we drive down operating costs, revitalize aging buildings and eliminate costly maintenance issues.

Mechanical Systems - We recognize the interactions among the various components of mechanical systems – heating, cooling, refrigeration, ventilation, and hot water generation. We identify opportunities to improve efficiency through equipment upgrades, improved maintenance, heat/chill recovery, operating practices, and behavioral changes.

Lighting - Paybacks on investments in lighting improvements are particularly strong, even when retrofitting current technology T-8 systems. We are lighting experts and understand the need for an environment that is both safe and efficient.

Renewable Energy. Once your buildings are operating efficiently, we can evaluate if and how renewable energy sources can be used to accomplish your financial and environmental objectives.

Building Controls - Automated building controls help manage the "human factor" and assure that behavioral changes stick. We can improve your existing controls systems or retrofit new controls to manage your lighting and mechanical equipment.

Building Shell - The right amount of insulation, windows that allow optimal solar/thermal gain, tight door seals and the elimination of other leaks in the building exterior are necessary for buildings to operate at maximum efficiency.

AWARDED CONTRACTS "View EDGAR Doc" on Website

Contract	Comodity	Exp Date	EDGAR
220104	Energy Savings Performance Contracts	03/31/2027	See EDGAR Certification Doc.
23010401	Trades, Labor, and Materials (NON-JOC)	04/30/2028	See EDGAR Certification Doc.
