Overview

National Fleet Tracking has been in the transportation industry for more than 10-years. We have a comprehensive school bus solution, BusView, which provides GPS tracking, RFID student monitoring, Parent App / Portal, Routing, Field Trips, Maintenance / Work Order Support and Driver / SubDriver Tablets, to hit the high-points.

Our video solution, CameraView, is a customizable video surveillance solution, which includes HD wide-angle cameras (IP66, night vision, Sony CMOS - internal and external), HD DVR, GPS Receiver and Microphones and our solution supports viewing videos from any smart device when buses are within the school district's wifi network, so no need to pull drives to view videos. Our video portal is user-friendly and events are marked on the map via GPS.
