Overview

Piera Systems' mission is to make air quality measurement as accurate, simple, and pervasive as temperature, enabling a major improvement in the health of all humans. The Canaree family of air quality monitors use a patented microchip and AI/ML techniques to identify pollution sources such as vape, smoke, cooking, construction dust, pathogens and more. The SenseiAQ air quality monitoring platform will monitor and alert users to poor air quality and pollution events. Piera Systems has over 200 customers across various market segments like schools, hospitals, hotels, property managers, and smart buildings.

Canaree has been selected as a CES® 2023 Innovation Awards honoree in the Digital Health category, as well as the 2023 AI Product of the Year by the Edge/AI Alliance.
