Overview

The DreamBox Learning research-based math and reading solutions leverage data to personalize instruction for each student. Our adaptive programs allow educators to better support and track each student's individual academic journey and ensure they experience learning tailored to their needs. DreamBox Math adapts and differentiates instruction in real time based on students' answers and how they approach and solve math problems. By automatically and continually supporting learners at their levels, the program ensures they stay motivated as they build math skills. DreamBox Reading Park helps build foundational reading skills by personalizing engaging, research-based instruction for PreK–2 students. DreamBox Reading Park uses advanced adaptive technology to deliver research-based pedagogy that develops phonemic awareness, phonics, decoding, and fluency skills for PreK–2 students. DreamBox Reading Plus is an adaptive literacy solution that targets instruction and scaffolding to improve silent reading fluency, comprehension, vocabulary, and motivation for students in grades 3–12. DreamBox Reading Plus customizes instruction for students by placing them at their just-right levels based on assessment data that continually adapts with student interaction. As students work through the program, they discover diverse content, experience literacy growth, and develop into confident, lifelong readers.
