Overview

ManagedMethods is the leading Google Workspace and Microsoft 365 cybersecurity, student safety, and data protection platform for K-12 school districts. The platform monitors district Google Workspace, Microsoft 365, and Zoom email, file sharing, chat, and video apps 24/7/365 and provides award-winning cloud security that empowers district IT teams with full visibility and control of their cloud environment.

ManagedMethods makes Google Workspace and Microsoft 365 security easy — no proxy, no agent, no extension and no special training needed. The platform helps school districts secure sensitive student, staff, and district data using machine learning-powered threat protection against malware and phishing, and detects abnormal behavior to protect against account takeovers and the loss of sensitive data. It also monitors for student safety signals, such as cyberbullying, self-harm, racial and LGBTQ discrimination, threats of violence, and abuse in both text and image content.

ManagedMethods is the education industry's only Google Workspace, Microsoft 365, and Zoom cybersecurity and student safety platform that can be deployed in minutes with no special training and zero impact on users or network speed.
