Overview

Established in 201, Onward launched a mission to provide solutions to solve special education school-based Medicaid needs. Our Special Education management solutions is the most widely used system in the nation with over 1600 school district adoptions-including Texas. In 2019, Onward began offering Medicaid billing and consulting services in response to customer requests.

Onward Learning brings together extensive "medical" billing experience, special education experience, and most importantly, national school-based Medicaid claiming experience. It cannot be stressed enough that this program is NOT just another medical insurance or Medicaid program - it is a unique, complicated, yet superb opportunity for school districts to receive reimbursement for services already being delivered to students receiving Special Education and Related Services.

Utilizing Special Education and Medicaid billing best practices, we have built a suite of services that focuses on the distinctive needs of school districts wanting to truly maximize the amount of Medicaid revenue being generated. Onward is the state-of-the-art, robust web-based data collection software system and account management summarization. Offering mobile applications, special education Transportation tracking software and personalized training systems, Onward partners with school districts for complete SHARS and MAC Medicaid support.
