Customer Support

Agreements

Agreements for purchase will normally be put into effect by means of a contract, agreement, or purchase order(s) executed by authorized agents of the TIPS Member participating government entities, but other means of placing an order may be used at the Member's discretion. Vendor accepts and understands that when a purchase order or similar purchase document is sent from a customer through TIPS to the Vendor, TIPS is recording the purchase and verifying whether the purchase is within the parameters of the TIPS Contract only. Vendor agrees that TIPS is not a legal party to the purchase order or similar purchase document and TIPS is not responsible for identifying fraud, mistakes, or misrepresentations for the specific order. Vendor agrees that any purchase order or similar purchase document issued from a customer to Vendor, even when processed through TIPS, constitutes a legal contract between the customer and Vendor only. A Vendor that accepts a purchase order or similar purchase document and fulfills an order, even when processed through TIPS, is representing that the vendor has carefully reviewed the purchase order or similar purchase document for legality, authenticity, and accuracy.

Tax exempt status

Most TIPS Members are tax exempt and the related laws and/or regulations of the controlling jurisdiction(s) of the TIPS Member shall apply.

Assignments of Agreements

No assignment of this Agreement may be made without the prior notification of TIPS. Written approval of TIPS shall not be unreasonably withheld. Payment for delivered goods and services can only be made to the awarded Vendor, Vendor designated reseller or vendor assigned company. Notwithstanding the foregoing, Ameresco may retain the services of subcontractors to perform any portion of its duties pursuant hereto without requiring notice to, or consent of, TIPS with the understanding that the Awarded Vendor is ultimately responsible for meeting all contract requirements.

Disclosures

- Vendor and TIPS affirm that he/she, or any authorized employees or agents, has not given, offered to give, nor intends to give at any time hereafter any economic opportunity, future employment, gift, loan, gratuity, special discount, trip, favor or service to a public servant in connection with this Agreement.
- Vendor shall attach, in writing, a complete description of any and all relationships that might be considered a conflict of interest in doing business with the TIPS program.
- The Vendor affirms that, to the best of his/her knowledge, the offer has been arrived at independently, and is submitted without collusion with anyone to obtain information or gain any favoritism that would in any way limit competition or give an unfair advantage over other vendors in the award of this Agreement.

Term of Agreement and Renewals

The Agreement with TIPS is for approximately **five (5)** years with an option for renewal for an additional **one (1)** consecutive **year**. If TIPS offers the renewal extension year, the Vendor will be notified by email to the primary contact of the awarded Vendor and shall be deemed accepted by the Vendor unless the awarded Vendor notifies TIPS of its objection to the additional term. TIPS may or may not exercise the available extension(s) provided in the original solicitation beyond the base **five-year** term. Whether or not to offer the extension is at the sole discretion of TIPS.

“Start Date” for Term Calculation Purposes Only: Regardless of actual award/effective date of Contract, for Agreement “term” calculation purposes only, the Agreement “start date” is the last day of the month that Award Notifications are anticipated as published in the Solicitation

Example: *If the anticipated award date published in the Solicitation is March 24, 2022 but extended negotiations delay award until June 27, 2022 The end date of the resulting initial “five-year” term Agreement, (which is subject to an extension(s)) will still be March 31, 2027.*

“Termination Date”: The scheduled Agreement “termination date” shall be the last day of the month of the month of the Original Solicitation’s Anticipated Award Date plus **five years**.

Example: *If the original term is approximately five years, and the solicitation provides an anticipated award date of March 24, 2022, the expiration date of the original five-year term shall be May 31, 2027.*

Extensions: Any extensions of the original term shall begin on the next day after the day the original term expires.

Example Following the Previous Example: *If TIPS offers a one-year extension, the expiration of the extended term shall be March 31, 2028.*

TIPS may offer to extend Vendor Agreements to the fullest extent the original Solicitation permits but is not required to do so.

Automatic Renewal Clauses Incorporated in Awarded Vendor Agreements with TIPS Members Resulting from the Solicitation and with the Vendor Named in this Agreement.

No Agreement for goods or services with a TIPS Member by the awarded vendor named in this Agreement that results from the solicitation award named in this Agreement, may incorporate an automatic renewal clause that exceeds month to month terms with which the TIPS Member must comply. All renewal terms incorporated in an Agreement by the vendor with the TIPS Member shall only be valid and enforceable when the vendor receives written confirmation by purchase order, executed Agreement or other written instruction issued by the TIPS Member for any renewal period. The purpose of this clause is to avoid a TIPS Member inadvertently renewing an Agreement during a period in which the governing body of the TIPS Member has not properly appropriated and budgeted the funds to satisfy the Agreement renewal. This term is not negotiable and any Agreement between a TIPS Member and a TIPS awarded vendor with an automatic renewal clause that conflicts with these terms is rendered void and unenforceable.

Shipments

The Vendor shall ship, deliver or provide ordered products or services within a commercially reasonable time after the receipt of the order from the TIPS Member. If a delay in said delivery is anticipated, the Vendor shall notify TIPS Member as to why delivery is delayed and shall provide an estimated time for completion of the order. TIPS or the requesting entity may cancel the order if estimated delivery time is not acceptable or not as agreed by the parties.

Invoices

Each invoice or pay request shall include the TIPS Member’s purchase order number or other identifying designation as provided in the order by the TIPS Member. If applicable, the shipment tracking number or pertinent information for verification of TIPS Member receipt shall be made available upon request.

Payments

The TIPS Member will make payments directly to the Vendor, the Vendor Assigned Dealer or as agreed by the Vendor and the TIPS Member after receiving invoice and in compliance with applicable payment statute(s), or as otherwise provided by an agreement of the parties.

Pricing

All pricing submitted to TIPS' Members shall include the participation fee, as provided in the solicitation, to be remitted to TIPS by the Vendor. Vendor will not show adding the fee to the invoice presented to TIPS Member customer.

Participation Fees and Reporting of Sales to TIPS by Vendor

The Participation Fee that was published as part of the Solicitation and the fee published is the legally effective fee, along with any fee conditions stated in the Solicitation. Collection of the fees by TIPS is required under Texas Government Code §791.011 Et seq. Fees are due on all TIPS purchases reported by either Vendor or Member. Fees are due to TIPS upon payment by the Member to the Vendor, Reseller or Vendor Assigned Dealer. Vendor, Reseller or Vendor Assigned Dealer agrees that the participation fee is due to TIPS for all Agreement sales immediately upon receipt of payment including partial payment, from the Member Entity and must be paid to TIPS at least on a monthly basis, specifically within 31 calendar days of receipt of payment, if not more frequently, or as otherwise agreed by TIPS in writing and signed by an authorized signatory of TIPS. Thus, when an awarded Vendor, Reseller or Vendor Assigned Dealer receives any amount of payment, even partial payment, for a TIPS sale, the legally effective fee for that amount is immediately due to TIPS from the Vendor and fees due to TIPS should be paid at least on a monthly basis, specifically within 31 calendar days of receipt of payment, if not more frequently. **Fees for this RFQ is 1% of the sale price paid by the TIPS Member entity.**

Reporting of Sales to TIPS by Vendor

Vendor is required to report all sales under the TIPS contract to TIPS. When a TIPS Member initiates a purchase with a TIPS Awarded Vendor, if the Member inquires verbally or in writing whether the Vendor holds a TIPS Contract, it is the duty of the Vendor to verify whether or not the Member is seeking a TIPS purchase. Once verified, the Vendor must include the TIPS Contract number on any communications and related sales documents exchanged with the TIPS Member entity. To report sales, the Vendor must login to the TIPS Vendor Portal online at https://www.tips-usa.com/vendors_form.cfm and click on the PO's and Payments tab. Pages 3-7 of the [Vendor Portal User Guide](#) will walk you through the process of reporting sales to TIPS. Please refer to the TIPS [Accounting FAQ's](#) for more information about reporting sales and if you have further questions, contact the Accounting Team at accounting@tips-usa.com. The Vendor or vendor assigned dealers are responsible for keeping record of all sales that go through the TIPS Agreement and submitting same to TIPS. Failure to render the participation fee to TIPS shall constitute a breach of this agreement with our parent governmental entity, Texas Education Service Center Region 8, as established by the Texas legislature and shall be grounds for termination of this agreement and any other agreement held with TIPS and possible legal action. Any overpayment of participation fees to TIPS by a Vendor will be refunded to the Vendor within ninety (90) days of receipt of notification if TIPS receives written notification of the overpayment not later than the expiration of six (6) months from the date of overpayment and TIPS determines that the amount was not legally due to TIPS pursuant to this agreement and applicable law. It is the Vendor's responsibility to identify which sales are TIPS Agreement sales and pay the correct participation fee due for TIPS Agreement sales. Any notification of overpayment received by TIPS after the expiration of six (6) months from the date of overpayment will be non-refundable. Region 8 ESC and TIPS reserve the right to extend the six (6) month deadline to notify if approved by the Region 8 ESC Board of Directors. TIPS reserves all rights under the law to collect the fees due. Please contact TIPS at tips@tips-usa.com or call (866) 839-8477 if you have questions about paying fees.

Indemnity

The Vendor agrees to indemnify and hold harmless and defend TIPS, TIPS Member(s), officers and employees from and against all claims and suits by third parties for damages, injuries to persons (including death), property damages, losses, and expenses including court costs and reasonable attorney's fees, arising out of,

or resulting from negligent or intentional acts on the part of the Vendor, its officers, employees, agents, subcontractors, licensees, or invitees. Parties found liable shall pay their proportionate share of damages as agreed by the parties or as ordered by a court of competent jurisdiction over the case. **NO LIMITATION OF LIABILITY FOR DAMAGES FOR PERSONAL INJURY OR PROPERTY DAMAGE ARE PERMITTED OR AGREED BY TIPS/ESC REGION 8.** Per

Texas Education Code §44.032(f), and pursuant to its requirements only, reasonable Attorney's fees are recoverable by the prevailing party in any dispute resulting in litigation.

Notwithstanding anything to the contrary in this Agreement, the Vendor's liability to TIPS shall be limited to unmitigable direct damages actually incurred by TIPS with respect to any and all claims arising out of the performance or nonperformance of the Vendor's obligations under this Agreement and shall not in total exceed the amounts paid under this Agreement. Nothing in this agreement limits the Vendor's liability to a TIPS Member that contracts with the Vendor for services unless otherwise agreed by the TIPS Member and the Vendor. NEITHER TIPS NOR THE VENDOR, NOR THEIR RESPECTIVE OFFICERS, DIRECTORS, EMPLOYEES, AGENTS, ADVISERS, REPRESENTATIVES, AFFILIATES, OR SUCCESSOR OR ASSIGNS WILL BE LIABLE TO THE OTHER PARTY FOR ANY INDIRECT, CONSEQUENTIAL, SPECIAL, OR PUNITIVE DAMAGES FOR ANY ACTIONS RESULTING FROM OR ARISING OUT OF THIS AGREEMENT OR ANY ORDER, WHETHER BASED ON CONTRACT, WARRANTY, TORT (INCLUDING NEGLIGENCE), STRICT LIABILITY, PROFESSIONAL LIABILITY, CONTRIBUTION, OR OTHERWISE. NOTHING IN THIS AGREEMENT LIMITS THE VENDOR'S LIABILITY TO A TIPS MEMBER THAT CONTRACTS WITH THE VENDOR FOR SERVICES UNLESS OTHERWISE AGREED BY THE TIPS MEMBER AND THE VENDOR.

State of Texas Franchise Tax

By signature hereon, the Vendor hereby certifies that he/she is not currently delinquent in the payment of any franchise taxes owed the State of Texas under Chapter 171, Tax Code.

Miscellaneous

The Vendor acknowledges and agrees that continued participation in TIPS is subject to TIPS sole discretion and that any Vendor may be removed from the participation in the Program at any time with or without cause. Nothing in the Agreement or in any other communication between TIPS and the Vendor may be construed as a guarantee that TIPS or TIPS Members will submit any orders at any time. TIPS reserves the right to request additional proposals for items or services already on Agreement at any time.

Purchase Order Pricing/Product Deviation

If a deviation of pricing/product on a Purchase Order or contract modification occurs between the Vendor and the TIPS Member, TIPS must be notified within five (5) business days of receipt of change order.

Termination for convenience is conditionally required under Federal Regulations 2 CFR part 200 if the customer is using federal funds for the procurement. All purchase orders presented to the Vendor, but not fulfilled by the Vendor, by a TIPS Member prior to the actual termination of this agreement shall be honored at the option of the TIPS Member. The awarded Vendor may terminate the agreement with ninety (90) days prior written notice to TIPS 4845 US Hwy North, Pittsburg, Texas 75686. The vendor will be paid for goods and services delivered prior to the termination provided that the goods and services were delivered in accordance with the terms and conditions of the terminated agreement. This termination clause does not affect the sales agreements executed by the Vendor and the TIPS Member customer pursuant to this agreement. TIPS Members may negotiate a termination for convenience clause that meets the needs of the transaction based on applicable factors, such as funding sources or other needs.

Usually, purchase orders or their equal are issued by participating TIPS Member to the awarded vendor and should indicate on the order that the purchase is per the applicable TIPS Agreement Number. Orders are typically emailed to TIPS at tipspo@tips-usa.com.

The Members need to know if your company is willing to sell to them when they spend federal budget funds on their purchase. AMERESCO 

Energy Savings Performance Contract

With an ESPC, you can leverage energy savings to generate capital to renew facilities and building systems.

Energy savings performance contracting (ESPC) provides a simple solution to a big challenge: completing necessary infrastructure upgrades when budgets are too tight or non-existent.

An ESPC is budget-neutral in that you use the money you are already spending on monthly utility bills to finance your energy infrastructure and facility improvements. During the contract, energy-efficient upgrades yield savings that pay for the work. When the performance contract is complete, you receive the full benefit of energy-efficiency savings, providing capital for further facility improvements.

As your trusted sustainability partner, Ameresco has all the resources needed to plan and execute a comprehensive energy program that will create real, sustained economic benefit.

Why Ameresco?

Our team of energy experts will develop customized solutions that meet your unique financial, environmental and sustainability goals through efficiency services. Ameresco coordinates the upfront project costs and the customer repays that investment out of their energy savings over time.

Improvements Without Sacrifice

ESPCs allow facility owners to make energy and facility improvements when faced with budget cuts and other financial restraints. This enables completion of facility upgrade projects that would otherwise wait until critical failure, while controlling consumption as utility costs rise.

Better Buildings

Replacing aging equipment with high-efficiency technologies delivers benefits beyond lower utility bills and reduced maintenance costs. Improved lighting, better air quality, and more comfortable room temperatures are also proven to be happier, more productive environments with higher performance results.

Cost Savings

Ameresco ESPC programs produce energy savings while reducing long-term maintenance costs. The facility owner is the beneficiary of all savings during the term of repayment and beyond.

Packaged Solutions

Performance contracting streamlines facility improvements. With a single contract, you can address multiple energy-efficiency projects rather than doing one project at a time. Ameresco provides a full range of services and continues working with our clients once the projects are implemented to ensure optimal long-term energy performance.

Our Approach

Our comprehensive approach to managing an ESPC is designed to ensure that we deliver the maximum value for the lowest possible cost. We will identify the best solution for the project based on each customer's unique project priorities. Smart LED Street Lighting Solutions

Save Energy Costs with LED Street Lights

When selecting a partner for your lighting project, experience counts. With more than 500,000 LED street lights installed or contracted, Ameresco is the largest non-utility purchaser of LED street lights in the United States¹. We have helped customers across North America convert more than a half million street lights to LED technology and turn old lights into new savings.

Ameresco is not just another lighting vendor. We have an expansive network of best-in-class technology, integration, and data analytics partners. We expertly manage complex projects, in cities and campuses, to deliver measurable results for our clients. As a vendor-neutral provider, Ameresco delivers customized solutions for every project including technology objectively selected to fit each environment and set of client needs.

LED Street Light Project Services

- **Inventory Audit:** Our audits capture both street light and pole characteristics as well as pole spacing and placement, roadway classification, lane configuration, and other lighting application data such as average daily traffic and historic accident data. Ameresco also offers street lighting condition assessments and reconciliation of inventory and billing data.
- **Design Process:** Ameresco's best-in-class GIS-based design process maximizes energy savings and minimizes glare and light trespass. Using audit data, we identify common and critical lighting applications and develop luminaire specifications to ensure your illumination levels are achieved with the lowest possible energy consumption.
- **Light Fixture Selection:** We will evaluate options from a variety of vendors using photometric and lifecycle cost analysis. If desired, we can also compare the relative energy consumption of different color temperature options, and ensure that Dark Sky compliance is achieved.
- **Local Incentives and Rebates:** Ameresco has extensive experience identifying and capturing utility incentives and rebates (over \$35M for the Chicago Smart Lighting Project alone, for example) as well as grants from local, state, and federal government, and other sources. We complete rebate applications, conduct pre- and post-construction site visits with inspectors, and respond to inquiries from utility company staff regarding savings calculations.
- **Community Outreach:** Before, during, and after the project, Ameresco can provide community outreach to showcase how your LED street light conversion addresses your commitment to safety and sustainability.

Benefits of LEDs & Smart Lighting Controls

Smart, connected lighting systems monitor for outages and streamline lighting management. We have installed smart controls on more than 60% of the LED street lights we've installed to date. Smart lighting systems provide a foundation for additional Smart City applications, from parking to waste management.

LED technology and smart lighting controls revolutionize street lighting by delivering a safer streetscape while modernizing and reducing the costs of lighting, one of the largest areas of energy consumption for most cities. According to the DOE, widespread use of LEDs in the U.S. by 2027 could equate to more than \$30 billion in energy savings. Communities can embrace the efficiency, financial, and quality of life benefits of an LED upgrade.

Financial

- Reduce energy costs and consumption by 60-70%
- Save up to 80% on long term maintenance costs
- Reduce incoming 311 calls with smart lighting controls

Efficiency

- Improve service delivery with lighting management system
- Proactive maintenance with real-time monitoring

Solar PV generated electricity is the fastest growing energy source. Ameresco develops, installs, operates, and maintains solar energy systems for customers across markets and sizes.

Solar Energy Solutions

Ameresco has built various types of PV systems and customizes each project for the specific customer needs. We have built unique projects on municipal landfills, parking garages, parking lots, interstate highways, military bases, industrial plants, schools, campuses, airports, and more. Ameresco pairs solar PV projects with batteries and interconnection controls for microgrid applications to meet resiliency objectives.

Why solar energy?

- Meet sustainability and Corporate Social Responsibility goals
- Reduce annual power costs
- Remove electricity price risk volatility for 20+ years
- Attract workers who care about working for companies committed to renewable energy
- Show your customers and community your commitment to clean, renewable energy

- **Solar Farms** – Ameresco develops, permits, engineers, owns, and operates utility-scale solar PV projects interconnected to wholesale markets. We sell the power to utilities, large corporations, and institutional customers under virtual Power Purchase Agreements (PPA).
- **Roof Mount Solar Power Systems** – Schools, shopping centers, office buildings, and airports are examples of buildings best suited to host a solar array. Customers can either own the system (and directly receive the federal tax benefits) or purchase the electricity under a PPA.
- **Solar Canopies** – Parking lots and garages are ideal locations for solar arrays, offering significant real estate. Parked cars benefit from protection of heat from the sun in the summer and snow accumulation in the winter. Ameresco can install electric vehicle charging stations under the canopies, powered by the sun.
- **Solar Thermal** – Heating water is energy intensive and expensive. Ameresco's solar thermal solutions supplement existing building heating and hot water systems. These solutions lower operating costs and reduce fossil-fuels required for heating.
- **Community Solar** – Customers seeking the benefits of solar energy, but who are unable to host a solar PV array can purchase power from an Ameresco community or shared solar farm. Under community solar, customers typically receive a financial credit on their utility electricity bill for buying the solar PV power.

Solar Power Financing Options

Customers have a variety of options to either build, own, and operate solar PV systems or to simply buy the power. Ameresco works with each customer to determine the best-fit financing and ownership solutions.

Power Purchase Agreement (PPA)

In a typical PPA, Ameresco engineers, builds, owns, and operates a solar systems at no capital cost to the customer. The property owner buys solar PV generated electricity from Ameresco, displacing power normally purchased from their local utility.

Benefits include:

- Electricity cost savings from fixed price of solar electricity
- Only pay for solar electricity generated
- No operating, maintenance, or repair costs
- No capital investment

Purchase

Customers who want to receive the Investment Tax Credit, accelerated depreciation, and 100% of the power cost savings prefer to own the PV system designed and built by Ameresco.

Benefits include:

- Investment Tax Credit
- Accelerated depreciation
- Reduced electricity costs
- Retention of all other incentives

Energy Savings Performance Contract

With an energy savings performance contract (ESPC), project costs are paid over time from the energy savings realized by the project, eliminating the need for an up-front capital investment. Ameresco arranges low cost financing for customer ownership.

Benefits include:

- Ownership of equipment at end of contract
- Potentially lower energy costs during term of contract
- Fixed monthly payments
- No capital investment

Operating or Capital Lease

For customers with high credit scores, clients can lease a solar PV system. Ameresco designs, builds, and operates the system, and a bank provides the capital ownership of the system for 10 to 15 years.

Benefits include:

- No capital expenses during lease term
- Option to own at the end of the term
- Banks use tax benefits and pass through their savings as reduced lease payments

3 1 Do you want TIPS Members to be able to spend Federal grant funds with you if awarded? Is it your intent to be able to sell to our members regardless of the fund source, whether it be local, state or federal?

Most of our members receive Federal Government grants or other funding and they make up a significant portion of their budgets. The Members need to know if your company is willing to sell to them when they spend federal budget funds on their purchase. There are attributes that follow that include provisions from the federal regulations in 2 CFR part 200, etc. Your answers will determine if your award will be designated as eligible for TIPS Members to utilize federal funds with your company.

Do you want TIPS Members to be able to spend Federal funds, at the Member's discretion, with you?

Energy Savings Performance Contract

With an ESPC, you can leverage energy savings to generate capital to renew facilities and building systems.

Energy savings performance contracting (ESPC) provides a simple solution to a big challenge: completing necessary infrastructure upgrades when budgets are too tight or non-existent.

An ESPC is budget-neutral in that you use the money you are already spending on monthly utility bills to finance your energy infrastructure and facility improvements. During the contract, energy-efficient upgrades yield savings that pay for the work. When the performance contract is complete, you receive the full benefit of energy-efficiency savings, providing capital for further facility improvements.

As your trusted sustainability partner, Ameresco has all the resources needed to plan and execute a comprehensive energy program that will create real, sustained economic benefit.

Why Ameresco?

Our team of energy experts will develop customized solutions that meet your unique financial, environmental and sustainability goals through efficiency services. Ameresco coordinates the upfront project costs and the customer repays that investment out of their energy savings over time.

Improvements Without Sacrifice

ESPCs allow facility owners to make energy and facility improvements when faced with budget cuts and other financial restraints. This enables completion of facility upgrade projects that would otherwise wait until critical failure, while controlling consumption as utility costs rise.

Better Buildings

Replacing aging equipment with high-efficiency technologies delivers benefits beyond lower utility bills and reduced maintenance costs. Improved lighting, better air quality, and more comfortable room temperatures are also proven to be happier, more productive environments with higher performance results.

Cost Savings

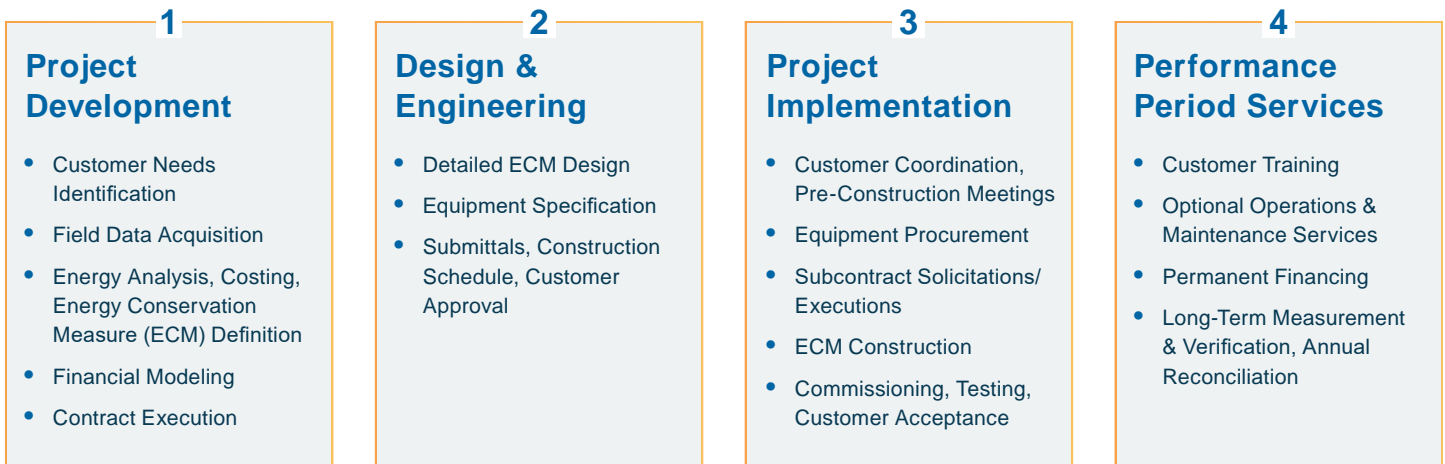

Ameresco ESPC programs produce energy savings while reducing long-term maintenance costs. The facility owner is the beneficiary of all savings during the term of repayment and beyond.

Packaged Solutions

Performance contracting streamlines facility improvements. With a single contract, you can address multiple energy-efficiency projects rather than doing one project at a time. Ameresco provides a full range of services and continues working with our clients once the projects are implemented to ensure optimal long-term energy performance.

Our Approach

Our comprehensive approach to managing an ESPC is designed to ensure that we deliver the maximum value for the lowest possible cost. We will identify the best solution for the project based on each customer's unique project priorities. As an independent energy services provider, we provide unbiased recommendations based solely on the needs of the specific facilities and project priorities.

Smart LED Street Lighting Solutions

Save Energy Costs with LED Street Lights

When selecting a partner for your lighting project, experience counts. With more than 500,000 LED street lights installed or contracted, Ameresco is the largest non-utility purchaser of LED street lights in the United States¹. We have helped customers across North America convert more than a half million street lights to LED technology and turn old lights into new savings.

Ameresco is not just another lighting vendor. We have an expansive network of best-in-class technology, integration, and data analytics partners. We expertly manage complex projects, in cities and campuses, to deliver measurable results for our clients. As a vendor-neutral provider, Ameresco delivers customized solutions for every project including technology objectively selected to fit each environment and set of client needs.

LED Street Light Project Services

- **Inventory Audit:** Our audits capture both street light and pole characteristics as well as pole spacing and placement, roadway classification, lane configuration, and other lighting application data such as average daily traffic and historic accident data. Ameresco also offers street lighting condition assessments and reconciliation of inventory and billing data.
- **Design Process:** Ameresco's best-in-class GIS-based design process maximizes energy savings and minimizes glare and light trespass. Using audit data, we identify common and critical lighting applications and develop luminaire specifications to ensure your illumination levels are achieved with the lowest possible energy consumption.
- **Light Fixture Selection:** We will evaluate options from a variety of vendors using photometric and lifecycle cost analysis. If desired, we can also compare the relative energy consumption of different color temperature options, and ensure that Dark Sky compliance is achieved.
- **Local Incentives and Rebates:** Ameresco has extensive experience identifying and capturing utility incentives and rebates (over \$35M for the Chicago Smart Lighting Project alone, for example) as well as grants from local, state, and federal government, and other sources. We complete rebate applications, conduct pre- and post-construction site visits with inspectors, and respond to inquiries from utility company staff regarding savings calculations.
- **Community Outreach:** Before, during, and after the project, Ameresco can provide community outreach to showcase how your LED street light conversion addresses your commitment to safety and sustainability.

Benefits of LEDs & Smart Lighting Controls

Smart, connected lighting systems monitor for outages and streamline lighting management. We have installed smart controls on more than 60% of the LED street lights we've installed to date. Smart lighting systems provide a foundation for additional Smart City applications, from parking to waste management.

LED technology and smart lighting controls revolutionize street lighting by delivering a safer streetscape while modernizing and reducing the costs of lighting, one of the largest areas of energy consumption for most cities. According to the DOE, widespread use of LEDs in the U.S. by 2027 could equate to more than \$30 billion in energy savings. Communities can embrace the efficiency, financial, and quality of life benefits of an LED upgrade.

Solar PV generated electricity is the fastest growing energy source. Ameresco develops, installs, operates, and maintains solar energy systems for customers across markets and sizes.

Why solar energy?

- Meet sustainability and Corporate Social Responsibility goals
- Reduce annual power costs
- Remove electricity price risk volatility for 20+ years
- Attract workers who care about working for companies committed to renewable energy
- Show your customers and community your commitment to clean, renewable energy

Solar Energy Solutions

Ameresco has built various types of PV systems and customizes each project for the specific customer needs. We have built unique projects on municipal landfills, parking garages, parking lots, interstate highways, military bases, industrial plants, schools, campuses, airports, and more. Ameresco pairs solar PV projects with batteries and interconnection controls for microgrid applications to meet resiliency objectives.

- **Solar Farms** – Ameresco develops, permits, engineers, owns, and operates utility-scale solar PV projects interconnected to wholesale markets. We sell the power to utilities, large corporations, and institutional customers under virtual Power Purchase Agreements (PPA).
- **Roof Mount Solar Power Systems** – Schools, shopping centers, office buildings, and airports are examples of buildings best suited to host a solar array. Customers can either own the system (and directly receive the federal tax benefits) or purchase the electricity under a PPA.
- **Solar Canopies** – Parking lots and garages are ideal locations for solar arrays, offering significant real estate. Parked cars benefit from protection of heat from the sun in the summer and snow accumulation in the winter. Ameresco can install electric vehicle charging stations under the canopies, powered by the sun.
- **Solar Thermal** – Heating water is energy intensive and expensive. Ameresco's solar thermal solutions supplement existing building heating and hot water systems. These solutions lower operating costs and reduce fossil-fuels required for heating.
- **Community Solar** – Customers seeking the benefits of solar energy, but who are unable to host a solar PV array can purchase power from an Ameresco community or shared solar farm. Under community solar, customers typically receive a financial credit on their utility electricity bill for buying the solar PV power.

Solar Power Financing Options

Customers have a variety of options to either build, own, and operate solar PV systems or to simply buy the power. Ameresco works with each customer to determine the best-fit financing and ownership solutions.

Power Purchase Agreement (PPA)

In a typical PPA, Ameresco engineers, builds, owns, and operates a solar systems at no capital cost to the customer. The property owner buys solar PV generated electricity from Ameresco, displacing power normally purchased from their local utility.

Benefits include:

- Electricity cost savings from fixed price of solar electricity
- Only pay for solar electricity generated
- No operating, maintenance, or repair costs
- No capital investment

Purchase

Customers who want to receive the Investment Tax Credit, accelerated depreciation, and 100% of the power cost savings prefer to own the PV system designed and built by Ameresco.

Benefits include:

- Investment Tax Credit
- Accelerated depreciation
- Reduced electricity costs
- Retention of all other incentives

Energy Savings Performance Contract

With an energy savings performance contract (ESPC), project costs are paid over time from the energy savings realized by the project, eliminating the need for an up-front capital investment. Ameresco arranges low cost financing for customer ownership.

Benefits include:

- Ownership of equipment at end of contract
- Potentially lower energy costs during term of contract
- Fixed monthly payments
- No capital investment

Operating or Capital Lease

For customers with high credit scores, clients can lease a solar PV system. Ameresco designs, builds, and operates the system, and a bank provides the capital ownership of the system for 10 to 15 years.

AssetPlanner

Proactive Sustainability Platform

Ameresco's **AssetPlanner™** – a comprehensive Asset Management software platform – is designed to drive your organization's sustainability goals and focus attention on the value that assets deliver to stakeholders. Built upon a common Asset Register, AssetPlanner's suite of nine modules help to turn organizational objectives into technical and financial decisions that assure your assets fulfill their required function.

Ameresco's AssetPlanner modules, combined with optional managed services, give you the ability to capture utility bill data and high volume, high velocity real-time data from any building automation system, meter, sensor and IoT device. These powerful features allow you to define your proactive sustainability strategy and translate it to real sustainability controls to meet performance objectives.

The **Energy & Sustainability Module** provides energy analytics tools to measure efficiency of your assets, track energy performance over time, benchmark against industry targets, and identify savings opportunities. Create consumption baselines, equivalent units of energy

for centralized analysis, and cost avoidance reports using built-in regression analysis for weather normalization. Assess greenhouse gas emissions and calculate your assets' carbon footprint for organization environmental impact reporting.

Real-time and historical data in the **Energy & Sustainability Module** includes utility monthly data, energy consumption, solar generation, and building automation system for whole buildings and individual equipment. By proactively monitoring, reporting, and analyzing energy and related equipment, you can save up to 15% of total energy consumption.

The **AnalyticsPlanner Module** connects AssetPlanner to any Building Automation System. This feature allows the module to build rules based on a library of templates. When paired with **Energy & Sustainability**, **AnalyticsPlanner** users can create charts and summary reports specific to KPIs, set up virtual points, and determine problematic situations with fault detection

and diagnostics (FDD). An integration between **Energy & Sustainability** and **AnalyticsPlanner Modules** with our **Service Request Module**, allows work orders to be created automatically within the centralized system.

Public Dashboard

All AssetPlanner modules have customizable dashboard tools to display real-time and historical data, comparison charts, picture slide shows, and local weather. Users can link to external websites to bring in news, autoplay dashboards for kiosk display and showcase the real-time environmental impact of your energy infrastructure.
