# SENSORY fidgets for calming

Fidgets are self-regulation tools to help with focus, attention, calming, and active listening. Fidgets come in a variety of shapes and sizes, they can be used by the hands, the mouth, the feet or the body. Benefits derived from a fidget depend on the fidget's unique characteristics. Fidgets that have weighted or resistive characteristics tend to be calming and organizing while fidgets that provide light touch sensations help wake up the body for improved focus and attention.

### CALLIROBICS

Calliobics (CALLigraphy and aeROBics) are a unique concept in handwriting exercises: repetitive simple writing patterns (straight & curved lines) to music.

The music is relaxing and adds rhythm to the exercises. With the music, the exercises become fun instead of tedious penmanship chores. Please see our website for more information.

Students are taught a self-check system to evaluate their own progress. Kit includes the teaching aids needed for the program and 9 laminated sheets, all in a large, convenient, reusable plastic envelope. ### FIKARS BLUNT TIP PRESCHOOL TRAINING SCISSORS

Large handle loops provide a comfortable grip, even when children put all four fingers into the loop. For children three and up..

**TAS39007** Preschool Training Scissors ..... **\$3.99**

### DUAL-CONTROLLED TRAINING SCISSORS

Developed, under consultation with Occupational Therapists, to assist the child with reduced grip strength, visual perceptual difficulties or tremor. The double loops

on each handle allow a teacher and child to simultaneously complete the cutting action. The child uses the loops furthest from the blade, while the teacher uses the other loops to assist with any necessary control, force or guidance. Dual Control Training Scissors are ideal for use with children to help in learning the opening and closing action of scissor skills. 6 1/4" long.

**TAS2403** Right Hand ..... **\$13.25**
