

Built with your DNA

From birth, your Autocar truck is a member of your family. It's custom-engineered from the wheels up and built just for you to meet the unique demands of your operation and application.

That's why Autocar trucks are more productive, more reliable, and cost less to run.

Not just a truck, a whole company

When you buy an Autocar you get a lot more than just the best truck. You get direct access to a whole team of people at Autocar dedicated to making you successful.

From the expert technicians at the Autocar Solutions® 24/7 service command center, to unlimited training, hundreds of service locations nation-wide, and a rapid-response parts team, Autocar will support you for the life of your truck.

All muscle, no fat

Autocar trucks are all-business because they're built with nothing extra to bend, break, or get in the way. Autocar frame rails are stronger and lighter, and your truck will have the exact powertrain, axles, and transmission options to do your job, not just an average one.

So, your truck will be built for the most payload, best reliability, and easiest serviceability.
