### Overview

*In 2002, we had a vision to build the first web-based visitor management system designed for K-12 schools and Raptor Technologies was born. Today, Raptor is trusted to protect over 32,000 K-12 schools across our nation and Raptor continues to develop innovative, integrated school safety technologies. Our mission is to protect every child, every school, every day. Since its inception, Raptor has identified and alerted officials to more than 50,000 sex offenders attempting to enter our clients' schools and issued over 250,000 custody alerts. The Raptor system has also been credited with the arrests of numerous absconded sex offenders that have crossed state lines. In 2019, Raptor Technologies acquired LobbyGuard®. User-friendly, self-contained, Wi-Fi enabled LobbyGuard kiosk visitor management systems help companies safeguard their workplaces, protect inventory and intellectual property, and ensure regulatory compliance. Join us today and allow Raptor to help protect your school.*

#### *Raptor Visitor Management*

*The Raptor Visitor Management system screens and tracks everyone coming in and out of your buildings so you can keep unwanted entrants out. It screens for sex offenders, alerts staff of custody violations, and provides district-wide reporting on all visitors. Our system has flagged more than 50,000 registered sex offenders and has issued over 250,000 custody alerts. The Raptor Visitor Management system offers: instant sex offender and custom database screenings; accurate visitor records; district-wide reporting; and emergency panic buttons.*

#### *Raptor Volunteer Management*

*The Raptor Volunteer Management system is an end-to-end solution for your volunteer program from application to screening to reporting. Managing a team of volunteers doesn't have to be a time-consuming process. The Raptor Volunteer Management system streamlines the process so that volunteers can apply and be easily tracked, screened, and scheduled, and reports can be accessed—all from a single, user-friendly set of dashboards. During an average school year, the Raptor system helps districts manage and track over 400,000 volunteers donating more than 11 million hours. The system manages nearly 2 million annual volunteer sign-ins, eliminates the use of over 250,000 paper applications per year, and reduces screening time for volunteer applicants from weeks to less than 24 hours.*

### *Raptor Emergency Management*

*The Raptor Emergency Management system combines proven practices with 21st century technology to help your district prepare for, respond to, and recover from any emergency. The system enables districts to manage drills, active emergency incidents, and parent-student reunification with the touch of a few buttons. Our Emergency Management system is fully integrated with our Visitor Management and Volunteer Management systems, giving district officials line of site and facilitating full accountability for all visitors, volunteers, and contractors—as well as students and staff—during any active emergency. The system has three modules: Drill Management, Active Incident Management, and Parent-Student Reunification.*

### *Raptor Self-Service Kiosks*

*The Raptor Self-Service Kiosks are equipped with the Raptor Visitor Management system and contain everything you need to track and screen visitors, volunteers, contractors, and staff entering your schools. Kiosk options include the Raptor Defender, which is a 22" touchscreen with a sturdy desktop stand or an option to be wall-mounted. The Raptor Versa Kiosk is a compact self-service kiosk that has a 10.1" tablet screen and weighs less than ten pounds. The Versa is easily transportable, so you can take it from your front desk to your gymnasium to screen and track visitors wherever they are entering the school.*
