Overview

The Infinite Talent Management Solutions SaaS Suite of applications offers a set of tools that organizations can use to reinvent the way they work. Whether clients are looking for a single solution to start, or an entire workforce solution, Infinite Talent offers the tools clients need to realize the promise of a smarter workforce - replacing guesswork with precision.

The Infinite Talent Management Solutions SaaS Suite deals with the following areas of Human Resources management:

Talent Acquisition is the practice of attracting and hiring top talent to meet client company's unique business needs. Done the right way, talent acquisition doesn't just fill jobs, it finds best fit candidates for client organizations. Infinite Talent offers comprehensive and integrated recruiting solutions powered by data-driven insights that help clients identify the skills clients need and incorporate precision into client recruitment and hiring practices.

Customer Relationship Management for Talent Management is the practice of tracking and developing a list of potential hires not-specific to any one role.

Talent Onboarding is the practice of successfully bringing those clients have attracted to apply positions and converting them into hired and started employees. Onboarding encompasses 3 pillars: compliance (local, state, federal, and client specific policy forms) physical readiness to start, and emotional readiness to start that together produce successful hires and drive down time to autonomy in a roll.
