Overview

LearnPlatform is the edtech effectiveness system for educators and their organizations to save time, save money and improve outcomes. Teachers, administrators and their partners use the ground-breaking software-as-a-service and research-based solutions to organize all their education technology, streamline standard processes (like purchasing, contract management and piloting) and rapidly analyze their classroom technology to learn what's working, for which students, and if its cost-effective. The SaaS edtech system of record gives education organizations the ability to inventory and select digital learning tools, establish and maintain regulatory compliance, and measure outcomes to gain meaningful, actionable evidence to ensure learning ecosystems are safe, impactful, and cost-effective.
