Overview

Edafio has experience with many large, complex, multi-site environments, equipping us to be a skilled business partner. Many of our clients have always-on environments that must be reliable and accessible 24x7x365. In such complex institutions, there are a variety of hardware and software vendors providing critical equipment and services, and we pride ourselves in being a technical liaison for our clients, helping ensure organizational goals are being met.

Edafio's engineers have the necessary experience, enabling us to consult with our clients about their specific environment in ways that are meaningful and provide value. We can help you with improved system performance, enhancing your user's IT experience and avoiding lost productivity.

At Edafio, we primarily serve our clients through IT consulting, IT managed services, cybersecurity services, healthcare consulting, and our private cloud offering.
