Overview

NV5 specializes in serving as an Owner's Representative (OR) to protect and advance property owner's interests in energy and sustainability projects. We focus on quality assurance for alternatively financed clean energy projects including Energy Savings Performance Contracts (ESPCs), a role we have been hired to perform over 150 times nationwide, overseeing all of the major Energy Service Companies (ESCOs). NV5 also advises clients on P3/Energy-as-a-Service (EaaS) projects, and we support clients in maximizing value by using Monitoring-Based Commissioning (MBCx), energy design reviews of new facilities, planning, developing and overseeing resilience/microgrid and street lighting projects, and developing/reviewing Commercial PACE projects. We also provide Measurement & Verification services to various agencies.

We are Subject Matter Experts in many energy technologies, including building automation systems, lighting, chiller/boiler plants, solar PV, battery storage, electric vehicles/infrastructure, and cogeneration. NV5 identifies and mitigates potential client risks, helps clients solicit competitive solutions from the marketplace, negotiates contracts that deliver greatest value, and provides quality assurance on contractors during implementation, all to achieve optimal results.

Our staff personnel have negotiated, sold, managed, engineered, commissioned, monitored, and verified over \$4.0 billion worth of energy efficiency related projects. We have a combined 200+ years of experience in the design, analysis, and implementation of clean energy projects. We are vendor neutral, technology agnostic and fiercely independent. We help our clients define their needs, procure solutions from the marketplace, solicit, and select contractors, and provide quality assurance on those projects.
