Overview

Energy & Environmental Solutions, LLC energy engineers draw on a variety of experience in the areas of engineering design consulting, equipment manufacturing, service, digital controls, and renewable energy solutions. Our engineering team has over 50 years of combined industry experience and we consistently achieve results with a dedication to excellence and an unwavering commitment to customer satisfaction. A representative list of engineering design solutions:

- ?Heating/cooling systems, including humidity control without the use of reheat
- ?LED Lighting
- ?Innovative variable air volume applications on AHU's and terminal units
- ?State of the Art demand control ventilation
- ?Variable speed primary drives on central plant hot water and chilled water systems
- ?Heat recovery water to water
- ?Solar Systems

Our Engineering Approach:

Design Engineering – EES design engineering solutions have been developed to meet or exceed AHSRAE standards. The recommended solution for TIPS Customers are designed to maximize cost effectiveness while providing a high quality long term solution. All solutions have been designed to meet these criteria while maximizing the system's energy savings potential.

Energy Engineering – Energy & Environmental Solutions uses utility bill tracking combined with equipment runtime measurement to calculate energy savings. We then reconcile the savings with the actual utility bills – our "Utility Bill Tracking" ensures that the energy savings that we are presenting matches the utility bills cost reduction.
