Overview

Ramtech has specialized in commercial modular construction since our beginning in 1982. Since that time we have provided more modular buildings to government agencies, educational institutions, healthcare providers, and commercial organizations than any other company in the Southwest. We've successfully completed over 4,000 projects using our extensive resources and experienced personnel, enabling us to provide our clients with a faster building process with less overall design and construction costs. Our vertically integrated design-build construction process allows us to offer a complete range of services from the initial facility design to the final finish out.
