### **Overview**

*RWH Energy is a Service-Disabled Veteran Owned Small Business created to provide our clients energy solutions to meet and exceed their energy goals. We have established a proven, turn-key approach to deliver service to our clients which provide significant energy reductions and overall cost savings. We assist our clients in achieving their energy goals by measuring their overall facilities' utility consumption, designing an energy plan, installing Energy Conservation Measures (ECMs) and guaranteeing energy savings. RWH Energy also offers finance solutions to fund energy projects to offset the need for any outlay of capital. The payments are structured below the energy savings effectively providing zero impact to the operational budget. In many cases we can actually provide an immediate increase in cash flows as well. RWH is owned and managed by three military veterans; each having served multiple combat tours around the globe. The honor, pride and commitment we provided in service to our country are now the corner stones of our business. Our project approach begins with understanding the needs of our clients. After we have discussed project goals and objectives RWH will conduct an initial site visit. This inspection will identify possible Energy Conservation Measures (ECMs) and allow us the opportunity to gather enough information to provide a Preliminary Assessment (PA) report. Once the PA is presented and ECMs are agreed upon, we will conduct a much more thorough Investment Grade Audit (IGA). Upon acceptance of the IGA, RWH will secure financing for the project and enter into the Engineering, Procurement and Construction (EPC) phase. Upon completion of EPC, the project is certified through Measurement & Verification (M&V) protocols and commissioned. RWH can also provide Operations and Maintenance (O&M) options if required.*
