Overview

Lightspeed is passionate about improving the listening and learning environment for every child. We believe this strengthens the connection between teachers and students. We excel at applying innovation technology to design intuitive, effective classroom audio solutions. These easy-to-use audio systems deliver optimum speech intelligibility, overcome classroom noise and provide crystal clear sound to all students regardless of where they may be seated or where the teacher may be standing. Teachers report reduced vocal fatigue, improved classroom management, and increased academic performance without changing curriculum or teaching methods. The high frequencies of the human voice, so easily lost amid classroom noise, come through clearly so every child hears (and understands!) every word.
