Overview

Double Line was founded in 2009 with a mission to improve data use at local and state K-12 departments and institutions. Our goal from the outset was to work with our customers to create solutions for departmental roadblocks, obstacles, and problems. We still have that teamwork focus today, providing solutions across the entire spectrum of IT education departments including general consulting, data services, performance improvements, assisting with technical decisions, and the development of customized tools. A result of our customer engagements over the past ten years has been a growing knowledge of tools and applications used in the education sector. As an organization, we work to share this knowledge with schools, districts, and states by participating in events, conferences, and individual working sessions.

Double Line has remained committed to our founding principles of bringing quality, timely, and rewarding solutions to education stakeholders. We are a customer focused company that prides ourselves on quality and timeliness of our projects.
