### **Overview**

Abtech specializes in backup and disaster recovery strategies, services, and hardware. From physical onsite backup and DR, to hybrid and cloud disaster recovery, Abtech features hardware and software from Dell, Quest, onsite/remote professional services, and Abtech's cloud service called StorTrust, to make designing and running DR easy.

Abtech has a team of backup and DR engineers experienced in designing, deploying, training, and recovering data from your backup or even spinning up your environment in the StorTrust cloud. We will implement your backup and DR solution either onsite with or without our hybrid cloud for your IT staff to administer, or you can choose for Abtech to administer it.

Our spinup service is unique as it is a "white glove service" done for you--you don't have to remember how you set it up years earlier, just call us and we'll spin up, recover a file, rescue you from ransomware, or roll back changes from a malicious insider. All DR contracts come with a yearly test where our engineers work with your IT team to make sure your environment will spin up correctly in a disaster.
