Overview

Salty Cloud, PBC offers scalable cloud-based security applications designed for highly distributed or regulated environments. We provide a suite of security tools for cloud-based deployment to institutions of any size with particular focus on places such as Education and Government where unique regulatory environments and scale make commercially available solutions unviable.

We believe that the best security solutions derive from understanding the real and acute pain points affecting security and risk teams in education and government today. This is why our initial core technology began with five in-licensed products from The University of Texas at Austin and a year later, we in-licensed our sixth product from Georgia Institute of Technology.
