Overview

Octopus BI. OctopusBI leverages education analytics's infinite power and potential to turn organizations into insight-driven institutions. A Business Intelligence platform and master connector, OctopusBI solves data problems for a total view of student, classroom, and business operations.

Octopus Insights delivers risk metrics for students based on engagement and performance factors. Our generative AI tool reads real-time data and provides conversational feedback.

Meaningful insights in Canvas have never been more accessible. With Octopus Insights, now your faculty, students, parents, and administrators can quickly identify which students need the most help.

Leveraging our own AI solution to read your data in real-time, you can see student performance and engagement in a quadrant view that allows for even more personalized interactions and learning supports.

Finally, we've added a chatbot where you can ask questions about the data and get real-time feedback for student interventions and support, all while keeping student data and privacy safe and secure.
