Overview

PS LIGHTWAVE provides services over 5,500 route-miles of fiber network topology constructed over a state-of-the-art Ciena optical core connecting 25 fault-tolerant, multi-gigabit Ethernet rings spread throughout the Greater Houston metro area. We have strategically-invested in a switched, Layer 2 network infrastructure that incorporates 50-60 data ring networks throughout Houston. This provides built-in redundancy, protecting our clients from downtime while delivering lower latency and faster connections. Offered Services•Ringed Ethernet Data Circuits Point-to-Point, Point-to-Multi-Point, Dark Fiber, Lit Fiber, High-speed Internet and Voice services including Business Phone, PRI and SIP. • PS LIGHTWAVE is proud to be certified by the Women's Business Enterprise National Council's standards as a Women's Business Enterprise (WBE) since 2012, affirming PS LIGHTWAVE is woman-owned and operated (WBENC National Certificate Number: 2005124385). PS LIGHTWAVE owns and maintains its fiber footprint. You work directly with us so there is no coordination of service providers. A complete end-to-end fiber solution: will be a design solution that consists of 100% fiber optics, which provides low latency and jitter (particularly appreciated for streaming video experiences). A Redundant Core Network: built-in redundancy with over 50 self-healing rings on our core network. Exceptional Customer Service and NOC Team Support: located here in Houston, our call center is staffed with local personnel who are familiar with the area, answer calls directly, are required to attend ongoing training, and get and maintain various service and equipment certifications. Contacting the NOC is easy, by phone or email, 24/7/365.
