Overview

Protocall is a national company with sustainable building solutions that revolve around protecting, restoring and optimizing HVAC/R systems through the implementation of high-performance coatings and specialized technologies. We have a broad, national service for protection of new equipment when required to meet specifications, or to meet other needs to protect critical assets.

As is often the case, when budgets do not allow for new equipment replacement or after common degradation and decline from operation, we offer solutions to restore and optimize existing equipment. Our menu of R&O solutions when bundled together, contribute greatly to the life extension of equipment, improvement to efficiency and capacity, tremendous energy savings, as well as reduction of ongoing maintenance costs.

No matter the equipment type at these facilities, all of our solutions will center around:

- 1. Protection of HVAC systems to prevent corrosion and early degradation*
- 2. Energy savings of HVAC systems through optimization*
- 3. Life extension of HVAC systems through protection and restoration*
- 4. Healthy indoor air quality with system remediation & IAQ solutions and validation*
- 5. Reduced operating costs, capex expenditures & preventative maintenance*
