Overview

GradeCam Gradient is a hybrid learning solution that allows assignments and assessments to be accessed online, on paper, or both, while conveniently compiling all the data. Teachers can easily assign, collect, grade, and provide feedback on student work through a user-friendly Student Portal using a variety of response types including handwritten open responses, rubrics, number grids, multiple choice, and more.

GradeCam Gradient also generates fast, flexible and shareable data that informs instruction and supports common assessments. It tracks established or custom standards and performance bands and automatically transfers grades into digital gradebooks. And perhaps best of all, it allows forms to be fully customized, printed on regular paper, and scanned and scored with any digital camera.
