Overview

Allana Buick & Bers, Inc. (ABB) is a leading Architectural Engineering firm with over 37 years of experience specializing in making buildings perform better. Our core "trade level" expertise and strengths are in all exterior façade trades, curtain wall and glazing, roofing and waterproofing, HVAC and plumbing, energy efficiency, structural engineering, and construction management. We perform investigation, testing, engineering design, and prepare construction documents for both remedial and new construction projects. For both new construction and existing buildings, our services result in enhanced building performance by making them energy efficient, longer lasting with lower operating costs, and by reducing risk during construction.
