Overview

Coastal Innovations provides state-of-the-art products to combat erosion and flooding including the FlexaFORCE Erosion Control Mat and the FlexaPRISM Temporary Water Dam. The patent-pending FlexaFORCE Mat is deployed, set into place, and filled with sand or concrete to form a snug-fitting protective barrier to eliminate erosion along roadsides, trails, ocean fronts, and rivers.

The patent-pending FlexaPRISM Water Dam deploys quickly and easily for storm flooding protection. Dams are 50-foot or 20-foot long independent water chambers that can be easily connected together to seal a protection zone at any length and shape required. Dams are ideal in low-area flood zones prior to hurricane season of rainy climates. They are re-usable, can be carried and deployed by a single person, and stored on a shelf until needed again. Visit www.Coastalinnovations.US for more information and latest products!
