Overview

Nouveau Construction is a customer service driven JOC contractor that not only builds projects but also builds long term client relationships. We have been a JOC contractor for 21 years, leading the way as JOC was being accepted in the construction industry as a product delivery system. We bring our many years of experience to help guide our clients through the entire project life-cycle from concept to closeout with speed, efficiency and quality. In addition, our Technology Services group is a single source for all of your data and telecom infrastructure needs. We offer Ethernet and fiber optic cabling, distributed antenna systems (DAS), automatic transfer switching, emergency code blue phone systems and much more. We are a woman-owned business and maintain MWBE and HUB certifications in the state of Texas. We invite you to visit our website for further information. www.ntsip.com
