Overview

KinderLab Robotics makes the KIBO Robot Kit, a screen-free, hands-on robot kit for introducing coding, computer science, and engineering in PreK through upper elementary.

KIBO is a robot kit specifically designed for young children. With KIBO, children build, program, decorate, and bring their own robot to life. KIBO is entirely screen free, as children program their robots with "tangible code" made of wooden blocks. KIBO is supported by over 20 years of research, led by KinderLab co-founder Professor Marina Bers, PhD., Director of the DevTech Research Group at Boston College.
